

Editor-in-Chief: Martin Latterich (United States)

***Proteome Science* is an open access, peer-reviewed, online journal that considers research in proteomics. *Proteome Science* focuses on a range of subjects in the area of structural biology, mass spectrometry, protein arrays, bioinformatics, HTS assays, protein chemistry, cell biology, signal transduction and physiology - as long as a component of the study relates to proteomics.**

Proteome Science is specifically interested in publishing articles that integrate functional or structural proteomic analysis with cell or developmental biology.

Proteome Science is tracked by PubMed, PubMed Central, Thomson Reuters (ISI), Biosis, CAS, Embase, Scopus and Google Scholar.

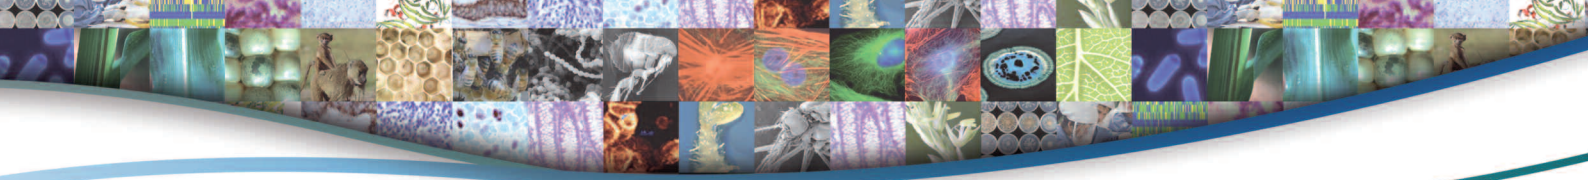

The journal considers the following article types: research articles, methodology articles and reviews. For further details, see www.proteomesci.com/info/about/.

Reasons for publishing in *Proteome Science*:

- All articles published in the journal are open access; universally accessible online without charge.
- High visibility for your work - anyone with Internet access can read your article, free of charge.
- Included in PubMed - making your work easy to find, read and cite.
- Articles are published immediately upon acceptance.
- Authors retain the copyright of their articles.
- Electronic submission and peer-review makes the whole process of publishing your article simple and efficient.
- Publishing online means unlimited space for figures, extensive datasets and video footage.
- Professional formatting meets the standards expected by researchers.
